

**Cheers for Paterno**

Thank you to David Paterno and his team of volunteers for gathering the information needed to revisit the two-building, \$68 million renovation of State High. His plan is very close to the school board's original plan, the one that many of the residents of this community, myself included, supported.

My only hope now is that school board members can recognize the value in this plan and agree to give it the serious consideration it deserves.

It's the one plan that may bring this community back together.

And we desperately need something to bridge the existing divide.
