Subject: Fine Piece of Work

GENTLEMEN...JUST FINISHED READING YOUR REPORT...CONGRATULATIONS!! THIS IS REALLY A FINE PIECE OF WORK!

A point in fact, even if I did not buy your conclusion I would be obliged to acknowledge the scholarly and unemotional fashion demonstrated throughout this document.

Interestingly, even though the School Board has gone to considerable lengths to solicit citizen input, I have never heard them say exactly why they believe so firmly in their plan. I would like to hear their rational.

I hope your plan is selected. I have no school age kids and no ax to grind...I have never even been in SC high but my kids did go to a mega school elsewhere in the state and it was not particularly helpful (so they tell me)

I am concerned about money. Spending 100 million dollars is a staggering prospect. It is even more so if the product could have been obtained for one third less.

My school tax has gone from\$2300 to \$3100in the few years I have lived here! And that's w/o the \$100 million bond issue the new school will require, or the millions that will be required to upgrade the other schools within the District.

Thank you for your efforts and for the thought process you obviously pursued. You are a credit to the Community! Thank you
